alexander@urazaev.com

Profile:

Dynamic Senior Frontend Developer with 8+ years of experience in commercial software engineering. Specialized in JavaScript and TypeScript, with a strong full-stack background. Proven expertise in creating cutting-edge UI/UX designs, driving project initiatives, and contributing to SaaS solutions. Experienced in both startup environments and mature teams, leveraging modern technologies to deliver excellence in software development and user experience.

Education:

B.Sc. in Computer Science, Focus on Information Security
Tashkent University of Information Technologies, September 2003 – May 2008

Employment history:

Senior Frontend Developer (React)
Lincoln Labs, Oshkosh, WI (remotely)
December 2022 - Present

- Transitioned projects to the more modern Vite build system.
- Developed 15 new components for the proprietary library.
- Engineered and implemented a comprehensive interface for lead management across various channels (CRM, E-mail).
- Optimized the codebase with modern technologies and improved application performance by 20%.
- Implemented a system for unit and end-to-end testing of the project and library components.

Senior Software Engineer
Azone Marketplace, Tashkent
November 2021 - November 2022

- Designed the microservices architecture (Frontend + Backend).
- Established development and deployment processes for creating an e-commerce project.
- Developed the architecture and complete functionality of the project, responsible for technical decision-making and integrations.
- Implemented integration with a payment system and tax authorities for the fiscalization of receipts.
- Designed an SQL database and optimized it for increasing loads.

- Launched the project from scratch to MVP.

Front End Engineer
Order Tiger, London (remotely)
August 2020 - October 2021

- Developed and deployed a scalable online food ordering system for restaurants, adhering to Agile processes and methodologies. Responsible for client-side solution development, architecture, and user experience.
- Integrated 25 new partner stores into the platform.
- Conducted a major refactor of the core functionality related to delivery zone mapping, resolving longstanding defects.
- Initiated and contributed to the migration of the project to a modern stack with React and TypeScript.

Full Stack Web Developer,
Freelance (remotely via Upwork.com)
September 2015- May 2020

Engaged in a diverse array of over 150 projects for clients globally, spanning Central Asia, Russia, the UAE, and the USA. Specialized in delivering tailored solutions for corporate websites, e-commerce platforms, SPA (Single Page Applications), CRMs and APIs.
Tech Stack: React, Next.js, Node.js, Express, MongoDB, MySQL, PostgreSQL

Key Contributions:

- Successfully delivered custom web applications, enhancing business operations and customer engagement for international clients.
- Engineered dynamic SPA architectures, CRMs and eCommerce, improving client-side performance and user experience.
- Designed and maintained robust databases, ensuring data integrity and optimal performance.
- Navigated complex project requirements, consistently delivering within tight deadlines.

Mentoring experience

Mentoring trainees / junior developers on htmlacademy.ru courses
October 2017- January 2021

- Mentored on 38 intensives
- Educated more than 350 students
- Average mentoring grade - 9.7

I train fully-fledged and in-demand specialists poised to make an impact in the web industry. From day one, my teaching approach is hands-on, guiding students through live coding sessions and

empowering them to tackle problems that closely resemble actual industry challenges. The intensive training I provide is deeply enriched by one-on-one mentorship, where I personally oversee progress, pinpoint inaccuracies, review assignments, and gradually shepherd students towards the fruition of their final projects. By imparting my extensive experience and adherence to best practices, I don't just teach; I mold aspiring talents into professionals ready to innovate and lead in the tech arena.

Certifications / Professional Development

Codding bootcamp (full stack web developer) 2021
Codding bootcamp from Algoritmika

IELTS 6,5 2021
